# THE QUICKBOOKS Advisor Program

### CHAPTER 1

### BECOME A QUICKBOOKS ADVISOR

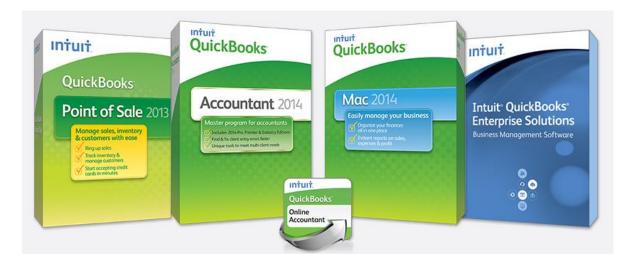

(HTTP://ACCOUNTANTS.INTUIT.COM/ACCOUNTING/PROADVISOR/)

CPAs and professionals can enroll to become a Certified QuickBooks ProAdvisor and have their name listed in QuickBooks Advisor referral database.

The program costs \$549 (\$200 more with payroll). As a Certified QuickBooks ProAdvisor:

- 1. **Software** You will receive a useable copy of \$3,000 worth of QuickBooks products including the following:
  - i. QuickBooks Accountant 2014
  - ii. QuickBooks Enterprise Solutions Accountant
  - iii. QuickBooks Enterprise Advanced Inventory
  - iv. QuickBooks Online Accountant
  - v. QuickBooks Point of Sale
  - vi. New features throughout the year and automatic upgrades

- 2. **Support** After successfully completing the initial certification exam, you will receive unlimited free priority technical support.
- 3. **Referrals** Your name will appear in the QuickBooks Advisor referral database. This database receives 450,000 visitors each year. Here is a video on this subject:

http://accountant.intuit.com/member\_programs/qb\_advisor/downloads/proadvisor\_overview.aspx

- 4. **Promotion** Additionally, Intuit will submit your information to more than 90 web sites such as Google, so you will have greater visibility
- 5. **17 Hours of CPE** Once you complete certification, you are also eligible to receive 17 CPE credits.
- 6. **Logos** Once you complete Certification, you are authorized to display the Certified QuickBooks ProAdvisor logo, on your web site and business cards and letterhead.

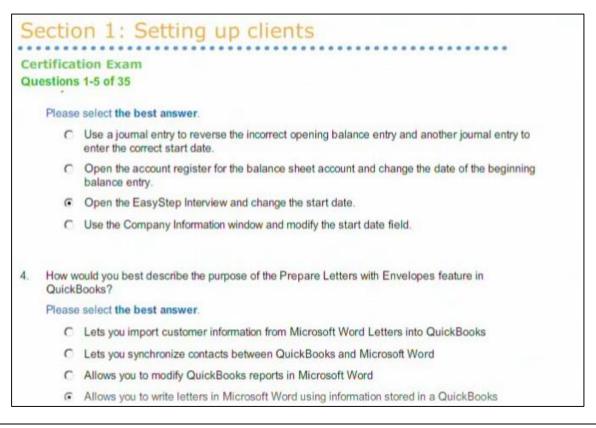

Requisite certification is required to display logos

- 7. **Charge More** Certified QuickBooks ProAdvisor report that they charge \$21 more per hour compared to what they were previously charging.
- 8. Info You will also receive the Intuit Newsletter, special Alerts, Newsletters and reference materials.

- 9. **Exam Training** The ProAdvisor program includes nine free training courses to help you prepare for the QuickBooks certification exam.
- 10. Hands-on Training Hands on training courses are also available for an additional charge.
- 11. **Purchase Discounted Software** Purchase Intuit software for your own use at discounts ranging from 10% to 40%- <u>https://accountants.intuit.com/secure/proadvisor/software/for-you.jsp</u>
- 12. Free Tax Preparation Prepare up to 5 tax returns free.
- 13. **Resale Software** Purchase Intuit software for resale at discounts ranging from 15% to 83% <u>https://accountants.intuit.com/secure/proadvisor/software/for-your-clients.jsp</u>
- 14. Free Payroll For up to one year.

### Taking the Exam Become a Certified QuickBooks ProAdvisor

Beginning in 2011, Intuit implemented mandatory certification in order to receive the same benefits you used to get as a regular QuickBooks ProAdvisor. Therefore, you should consider taking the next step above becoming a QuickBooks ProAdvisor, and take the test to become a *Certified* QuickBooks ProAdvisor. The exam is not hard, and there is no cost to ProAdvisors. Here are two example questions:

# **QUICKBOOKS FACTS**

### CHAPTER 2

### QuickBooks Facts

Intuit Inc. is a leading provider of business and financial management solutions for small and midsized businesses; financial institutions, including banks and credit unions; consumers and accounting professionals. Intuit's flagship products and services include **QuickBooks**, **Quicken** (bookkeeping); **TurboTax**, **ProSeries**, & **Lacerte**, (tax preparation); and **Digital Insight** (ondemand banking services).

Intuit's self-described workplace mantra is "*Bring Your Whole Self to Work*", a slogan which is meant to "acknowledge the overlap between the professional and the personal, and that one should not dominate the other. Intuit believes that you should work efficiently to get your work done because you won't get "extra credit" for staying late just to do more work.

Corporate Headquarters: 2632 Marine Way, Mountain View, CA 94043, 650-944-6000

Founded in 1983 by Scott Cook and Tom Proulx, Intuit went public in 1993. The current Executives are Brad Smith, President and Chief Executive Officer; Bill Campbell, Chairman of the Board; and Scott Cook, Chairman of the Executive Committee. Here I am pictured with Scott Cook in September 2014 at Intuit Headquarters.

# **CARLTON'S**

### **QUICKBOOKS MONTHLY CONSULTING CHECKLIST**

# CHAPTER 3

### **Monthly or Quarterly Procedures for CPAs**

Intuit previously reported that the average <u>QuickBooks consultant generates approximately</u> <u>\$2,800 per year in QuickBooks consulting fees, and this amount is now estimated at \$3,600 per year</u>. These fees just include QuickBooks related consulting and do not include additional fees for tax preparation, write up work, compilation or review work, etc.

The reality is that most QuickBooks users do not have a CPA on staff to assist them with the expert management of their accounting system, but they need that level of assistance. For just a few hundred dollars each month, the valuable input of a CPA can mean the difference between success and failure for many small businesses. For this reason, I have long provided this type of service to my clients, charging approximately \$275 to \$400 per month, or \$3,300 to \$4,800 per year. Presented below is an example of the monthly services I include in this fee:

### Carlton's Monthly QuickBooks Review - 25 Point Checklist

By the 10<sup>th</sup> of each month, I log in and review the prior month. I use the following checklist to conduct this review. Basically - I identify and fix any errors that I find. I post any adjustments that need posting. I move the posting date forward. I review financial statements and I provide the client with an e-mail containing advice based on my review. Initially this process takes 3 to 5 hours, sometimes more. But after 4 or 5 months, I can usually accomplish this task in about 90 minutes each month (sometimes more, sometimes less).

- 1. Review Retained Earnings for improper entries, correct any problems.
- 2. Review audit trail report for inappropriate changes, note any unusual changes, and investigate any suspicious activity.
- 3. Review cash balances, ensure that company is maintaining/investing proper cash levels. To do this, I review my notes in the client file which summarize the target amount of cash the client should maintain in checking and investments. I typically obtain this information during our initial interview.
- 4. Post depreciation entries as needed. (Use memorized transactions Feature)
- 5. Post amortizations and accruals as needed. (Use memorized transactions Feature)
- 6. Enter and post allocations adjustments as needed. (Use memorized transactions Feature)
- 7. Make sure all checks have been printed and sent. (I use Reminders to check this)
- 8. Make sure all quotes, sales orders, and invoices have been printed and sent. (I use Reminders to check this)
- 9. Make sure all deposits have been deposited. (I use Reminders to check this)

- 10. Make sure all purchase orders have been printed and sent. (I use Reminders to check this)
- 11. Calculate days in AR, determine if collections are being managed properly. To do this, I review my notes in the client file which summarize the days in AR over the past several years, and based on the targeted number of days according to the client. Once again, I typically obtain this information during our initial interview.
- 12. Calculate days in AP, determine if payables are being managed properly. To do this, I review my notes in the client file which summarize the days in AP over the past several years, and based on the targeted number of days according to the client. Once again, I typically obtain this information during our initial interview.
- 13. Calculate days in inventory, determine if inventory levels are at or near expected levels. To do this, I review my notes in the client file which summarize the days in Inventory over the past several years, and based on the targeted number of days according to the client. Once again, I typically obtain this information during our initial interview.
- 14. Scan Inventory reorder reports, determine whether inventory is being ordered timely and in correct quantities. In the early months of the engagement, I often find that I must help the client adjust the reorder levels in order for the reorder reports to be of value. For some clients, we have come up with seasonal reorder points for all inventory items, otherwise the report is not very meaningful throughout the year.
- 15. Scan for duplicate vendors, customers, employees, and accounts. Make corrections as necessary.
- 16. Review the voided transaction report, make corrections as needed. (In some cases, QuickBooks handles voided checks improperly.)
- 17. Review bank reconciliation, make sure bank reconciliation was processed, and processed correctly.
- 18. Print Balance Sheet to screen, spot check for accuracy. Review numbers, look for problem areas. Ferret out advice to give client.
- 19. Print Income Statement (actual to budget) to screen, spot check for accuracy. Compare to budget, review numbers, look for problem areas. Ferret out advice to give client.
- 20. Check to ensure that all necessary tax payments (federal, state, payroll, sales taxes, etc.) have been paid on a timely manner.
- 21. Review other reports as needed. Review numbers, look for problem areas. Ferret out advice to give client.
- 22. Move closing date forward by one month (or by one quarter if logging in quarterly).

- 23. Print month-end reports for client (using the Process Multiple Reports feature). The next morning, all of the necessary reports are printed, and the bookkeeper distributes them accordingly.
- 24. Send client an e-mail advising them that I have logged into their system, reviewed their financials, made corrections and entered adjustments as necessary, provide summary of adjustments and corrections made, advise client of the status of the financial statements, summarize any key observations, provide list of recommendations and advice based on my review.
- 25. Schedule training session with bookkeeper and appropriate personnel to address and correct any improper data entry practices.

The key to making this work is to be committed to bringing all errors to the attention of the bookkeeper and training them not to repeat the same error each month. Before logging into the client's accounting system (usually in the evening hours), I call the bookkeeper to coordinate and schedule my remote access session. I ask them to make sure that there is plenty of paper in the printer so I can print the reports. With persistent training, you will soon find yourself logging into an error free system – which should be your goal. This approach allows you to minimize your time, and primarily ensure that the client's books are accurate, and that a professional is helping them review the financial results regularly.

Depending upon the client, additional steps to review payroll, inventory prices, job versus job estimates, job billing, etc. may also become part of the standard service I provide each month or quarter. This explains the difference between a \$275 per month fee and a \$400 per month fee. Each additional procedure costs just a little bit extra. Additional locations, retail point of sale systems, and consolidated financials are all examples of situations which would call for additional billings.

**Ethical Issues** – <u>Please be aware that some CPAs take the position that if you personally make</u> just one change in the client's accounting system, you are obligated to prepare a compilation file and conduct a complete engagement as if you were compiling, reviewing or even auditing the client' books. Further the same CPAs feel that your engagement efforts should be subject to peer review. Of course, most of the CPAs who feel this way conduct peer reviews, and therefore their stance is somewhat self-servicing. There are other CPAs who believe that as long as you are not producing financial statements with your CPA Firm name and letterhead associated with them, then you are not obligated to treat each consultation as a full blown compilation engagement. Of course most the CPAs who feel this way provide this type of consulting service, therefore their stance is also a little self-serving.

**How I Sleep At Night** - My files are well documented. I do not produce cover letters or opinion letters with CPA firm logos that a banker or other financial professional might rely upon. My emails are fully disclaimed "For the Client's Eyes only". I am confident that I am not rendering services that may be construed in any way as a compilation, review or audit. However, <u>you should</u>

evaluate your particular practices and conduct your engagements and document your files accordingly.

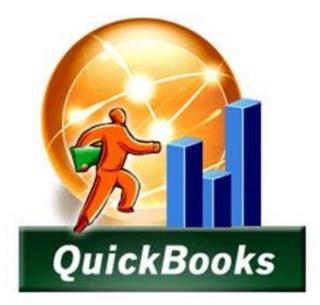

#### **Client Data Review**

Well after I created my checklist, Intuit added their own monthly or year-end review checklist, and it is much better than mine. It's called Client Data Review, and presented below are screen shots.

### **Statement Writer**

### **Memorized Transactions**

<u>QuickBooks allows you to memorize recurring transactions</u>. <u>These memorized transactions</u> <u>save time, help reduce mistakes and increase accuracy</u>. You can set up transactions to be <u>recorded automatically</u> at predetermined intervals, or if you prefer you can have QuickBooks simply remind you to record the transaction. The key points that I would like for you to know about memorized transactions are as follows:

- a. You can memorize all types of transactions including :
  - i. Estimates
  - ii. Sales Orders
  - iii. Invoices
  - iv. Credit Memos
  - v. Checks
  - vi. Purchase Orders
  - vii. Bills or Vouchers
  - viii. Deposits
  - ix. Journal Entries
- b. <u>You can control the frequency and duration</u> of memorized transactions, including the start dates and ending dates for entering memorized transactions.

<u>N</u> ame	Quarterly Hosting (Todd S.)			of total	ОК
🖲 Re	emind Me	How Often	Never		Cancel
	on't Remin <mark>d Me</mark>	Ne <u>x</u> t Date			
0 <u>A</u> u	utomatically Enter	Number Ren	naijning		
🔘 With Transactions in Group		Day <u>s</u> In Adv	ance To Enter 0		
		Group Name	<none></none>	-	

Here are examples of recurring transactions that will save you time to set up as memorized transactions in QuickBooks:

1. <u>Recurring Lawn Mowing Payment</u> - Each week you write the same check to pay the lawn boy for dropping by and mowing the lawn. Instead of creating 52 checks a year, create just one check, memorize it, and have QuickBooks enter and process the remaining 51 checks for you.

 <u>Recurring Apartment Rent Collections</u> – Each month an apartment building sends out 400 invoices to collect the rent from their 400 tenants. Instead of producing 400 invoices each month, have QuickBooks do the work for you.

3. <u>Recurring Depreciation Entry</u> – Each month you could have QuickBooks enter the monthly

depreciation entry so you don't have to. Not only does this save time, but it keeps you from forgetting and it enforces greater accuracy.

- 4. <u>Recurring Allocations</u> It is a common practice for many companies to accumulate various overhead costs and expenses in a single account, and then distribute those costs across all departments, locations, or Partners each month before producing reports. In this case, the amounts are not known until month but the journal entry accounts are. Therefore you could memorize an allocation journal entry containing all zero amounts, and each month you would need only drop in the relevant amounts before posting. Thus even when the amounts are unknown, using the memorized transaction
- 5. **Other Examples** Examples of other memorized transaction situations include:
  - Recurring loan or lease payments such as a monthly car loan payment.
  - Recurring bills such as the electricity or water bill.
  - Recurring electronic withdrawals from checking such as internet access.
  - Recurring sales transactions
  - Recurring rental fees for a rental shop

feature can save time and increase accuracy.

- Monthly installments payments due from customers
- Repeating tuition invoices
- Purchase Orders that are repeated with many of the same items
- Recurring Estimates for situations where you frequently quote the same items.

You memorizing transactions while the transaction activity window is open. Here are the necessary steps:

- 1. Enter the transaction as you would like it memorized.
- 2. Control + M or from the edit menu select "memorize".
- 3. Enter a name that will help you recognize the transaction.
- 4. Complete the options: How often, Next Date to enter, Number of remaining payments .

#### Later, to use the Memorized Transaction

- 5. Retrieve and use the memorized transactions from the list menu or use the shortcut CTRL+ T.
- 6. From this list window (CTRL + T) you can also:
  - 1. Permanently discontinue a memorized transaction highlight and delete the transaction (CTRL + D).
  - 2. To keep the transaction on the list but not active, highlight and edit the transaction (CTRL + E).
  - 3. Change the date or the frequency by highlighting and edit the transaction (CTRL + E).
  - 4. Occasionally there is a need to change the amounts within a memorized transaction (see below). Whenever a change to the amount is made, be sure to confirm that the date of the next transaction is correct. The date of the next entry appears on the memorized transaction list (CTRL + T)

Some of the transactions which cannot be memorized include payroll checks, time records, bill payments, or sales tax payments.

### Running an Efficient Accounting System

When operating an accounting system, (any other accounting system – QuickBooks or otherwise), it wise to schedule common accounting tasks to be performed at specified intervals throughout the week. Otherwise, a bookkeeper can waste a great deal of time jumping around from one task to the next.

For example, it is a common practice for companies to produce checks on Wednesday afternoon and place them on the officer's desk for review, approval and signing on Thursday. The checks are then typically handed out or mailed on Friday so that the recipient will not have the opportunity to deposit or cash the check until next Monday at the earliest. A bookkeeper that ignores this traditional timing might instead enter, process, and print checks throughout the week –

resulting in disorganization and redundant activities such as swapping check stock in and out of the printer.

A sample weekly schedule of accounting tasks might look like this :

	Monday	Tuesday	Wednesday	Thursday	Friday
8:00 AM					
9:00 AM					Credit Memos Processed
10:00 AM		Bills Entered		Bills Entered	Statements Sent
11:00 AM					
12:00 PM					
1:00 PM			Sales Orders Processed		Sales Orders Processed
2:00 PM			Process Payroll	Sales Orders Processed	Payroll Mailed
3:00 PM	Sales Orders Processed	Sales Orders Processed	Process Checks	Checks Signed	Checks Mailed
4:00 PM	Invoices mailed				
5:00 PM	Receipts Deposited				

In fact, it probably is best to create a monthly schedule of accounting tasks which also includes entering monthly transactions, processing and distributing reports, reconciling bank statements, importing and entering credit card details, etc.

### Reminders

Keeping in mind the efficiency discussion presented above, Reminders offer a great way to help you stay on top of your company's accounting tasks because <u>it reminds you of tasks</u> <u>which QuickBooks thinks you need to do</u> (such as printing checks, producing invoices, paying bills, and so on). QuickBooks provides three features that can help you keep up manage your tasks as follows, the 1. Reminder's List; 2. The To Do List; and 3. The Alerts Manager. These items are discussed below:

**Reminders List** – To use the Reminder's List, start by setting your reminder preferences in the Company Preferences dialog box shown below:

Preferences		-				Annual View	<b>—</b> X

QuickBooks can remind you of upcoming events or deadlines in summary or detail, you can toggle details on and off by double-clicking.

**"To Do" List** - To help ensure that you never miss a deadline or forget an important task, <u>you</u> <u>can add "To Do" items to your Reminder List</u>; they will not be displayed until they are due.

Edit To Do			
Note		nind <u>m</u> e on	ОК

			To Do Note is inactive
		<u>D</u> one	

**Marking Items as Done** - <u>To mark a "To Do" item as completed, place a check mark</u> displays in the "Done" box for that "To Do" note. You can also print your "To Do" list by clicking the "Print" button in the "To Do" List window.

**Examples** – Presented below are a list of possible "To Do" notes you might set up in your Reminder's list.

1. Employee birthdays or anniversaries.

- 2. Employee review dates or raise dates.
- 3. Employee's scheduled vacations.
- 4. Employee appointments.
- 5. Business events such as conferences, meetings or training sessions.
- 6. Payroll tax deadlines.
- 7. Important phone calls you need to make.
- 8. Scheduled marketing events.
- 9. Tax filing deadlines.
- 10. Physical inventory schedules.
- 11. Financial reporting activities.
- 12. Inventory reordering.

### Loan Manager

When it comes to recording loan payments, many small businesses record the transaction improperly. Often, they incorrectly debit the outstanding loan balance by the full amount of the payment instead of separating the loan payment into the proper interest and principal portions. Even bookkeepers who record this transaction correctly often expend too much time referring to amortization schedules or complicated calculations to manually enter the proper transaction. The QuickBooks Loan Manager tool provides a good solution to this problem.

QuickBooks Loan Manager manages basic loan repayments as well as complicated loans involving additional principal payments, escrow payments, adjustable interest rates, fees, charges, and what-if scenarios. Before you use Loan Manager, first make sure that you have set up the lender to whom the loan is payable as a vendor and a balance sheet account to track the loan. (To access the **New Vendor** dialog box, press **CTRL+ N** in the **Vendor Center** screen. To access the **New Accounts** dialog box, press **CTRL+ N** in the **Chart of Account List** screen). To start using Loan Manager select **Banking, Loan Manager** from the QuickBooks menu as shown below.

This action will open **Loan Manager**. Click the **Add a Loan** button to set up each outstanding loan. At a minimum, for each loan you will need the account name, lender name, origination date, original loan amount, interest rate, payment amount, number of periods, payment account and due date of the next payment in order to complete the set up process.

Once you have set up a loan, Loan Manager is ready to create the proper monthly (or periodic) payment transaction. To create the payment, in the Loan Manager dialog box, select a loan from the **Loan List** and click the **Set Up Payment** button as show in the screen below. Repeat this step for each loan to be paid.

Name		Balance	Next Payment	Amount	Add a Loan
Loan - Vehicle, Car	Iton's Truck	10,083.7	79 02/28/2014	262.56

Using this tool, your bookkeeper will be able to generate the necessary loan payment transactions correctly; and then, you and your bookkeeper will be off the hook.

### **Prevent Users from Making Prior Period Changes**

A common problem is that QuickBooks users can easily make changes to prior periods either intentionally, or unintentionally. <u>You can just as easily prevent prior period changes</u> from being made by taking the following four steps:

- 1. Set up user names and passwords so users can't log in as administrator.
- 2. Edit user preferences to prohibit bypassing the closing date.
- 3. Establish a closing date and move it forward each month after review and adjustments.
- 4. Set a closing date password.

Set Closing Date and Password	a construction and	×
To keep your financial data secure, QuickBooks rec username and password, in Company > Set Up Use		heir own
Date QuickBooks will display a warning, or require a p or before the closing date. <u>More details</u>		n dated on
Closing Date		

### **CTRL + 1 Product Information**

<u>Pressing the CRTL+1 key combination in QuickBooks will display a summary of product</u> <u>information</u> related to that particular installation of QuickBooks. Some of the more useful data displayed is as follows:

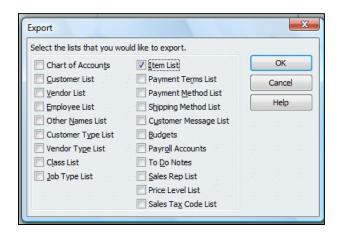

- 5. The QuickBooks Edition and Year
- 6. Data File Location
- 7. Product or Serial Number
- 8. License Number
- 9. **File Size** For QuickBooks Pro or Premier, file sizes of 200 to 500 MB indicates that the company is outgrowing QuickBooks. For QuickBooks Enterprise, files sizes of 1 GB or larger indicates that the company is outgrowing QuickBooks Enterprise.
- 10. List Size For QuickBooks Pro or Premier, list sizes close to 28,000 Items or 14,000 Customers, Vendors, Employees and other names indicates that the company is outgrowing QuickBooks. For QuickBooks Enterprise, list sizes close to 150,000 Items, Customers, Vendors, Employees and other names indicates that the company is outgrowing QuickBooks Enterprise.

As a consultant, you should press the Print Screen button, then Paste the results into Word and e-mail it to yourself from the client's computer. This way you will have a copy of the clients information for the file and to help protect the client in the event that the hard drive crashes.

### Edit Your QuickBooks Data in Excel

All of your account information, budgets and List data in QuickBooks can be exported out to Excel, edited, and imported back into QuickBooks in less than 30 seconds <sup>53</sup>. Many CPAs are apprehensive to use this feature for fear of squirreling up the data – but it is easy and you should give it a try. Presented below is the export dialog box found under File; Utilities; Export.

Simply open the IIF file in Excel, edit it, and save the file to the same format. Then in QuickBooks, select File; Utilities, Import...it's just that easy.

Note that importing data from Excel "overwrites" the list data in QuickBooks with all of your changes. However, you cannot delete list data using this method, you can only add to or change existing list data <sup>54</sup>.

#### **Custom Data Fields**

In my opinion, custom fields are one of the most powerful features in all of accounting software. QuickBooks provides 26 customer data fields (7 for customers, 7 for employees, 7 for vendors, and 5 for inventory items) but you are limited using just 20 custom data fields overall.

QuickBooks' custom data fields allow you to track additional information about your customers, vendors, employees, and items. You can add these custom data fields to sales and purchase forms. QuickBooks treats the information you enter into a custom field the same way it treats information entered into any other field. If you memorize a transaction that has a custom data field, QuickBooks memorizes what you entered in the custom data field along with the other details of the transaction. If you export a list that contains data in custom fields, QuickBooks exports that data along with the other data from the list. The custom field screen is shown below:

efine Fields					)

		_	_				

Many accounting system developers concluded more than a decade ago that the process of adding a never-ending stream of enhancements to any accounting system eventually results in "bloatware" - a bloated solution that is so cluttered with features that the product is

difficult, if not impractical, to use. To alleviate this problem, developers adopted forwardthinking philosophy of providing core features, coupled with built-in tools designed to allow end users to customize the product specifically for their needs. This approach allows end users to meet approximately 80% to 85% of their needs right out of the box, or approximately 90% to 95% of their needs using the built-in customization tools. The example scenario presented below provides a basic understanding of how this process works.

**For Example** - Assume that QuickBooks is implemented by the local U. S. Corps of Engineers office that oversees and manages a large lake. In this case, the agency has identified specific customized additions to the system that would be beneficial. For example, one of the functions of the agency is to license and inspect the various boat docks of residents who live on the edge of the lake. Using QuickBooks's built-in tools, the agency could easily add new data fields to collect pertinent information such as the following:

#### Examples of User Defined Data Fields that Might be used by the U. S. Corps of Engineers

- 1. Size of the dock.
- 2. Year the dock was erected.
- 3. Type of materials used.
- 4. Date of the last inspection.
- 5. Date when the current dock permit expires.
- 6. Depth of the water at this dock location.
- 7. Description of all vehicles docked at this particular dock.

All of this additional customized data would benefit the U. S. Corps of Engineers in rendering their services. These fields could be set up QuickBooks in just a few minutes by a non programmer.

All organizations have the need to collect, maintain, and report specific unique information about customers, inventory items, vendors, employees, etc. The ease in which QuickBooks meets complex customization needs is frequently a deciding factor in the accounting software purchase decision – it is a common deal closer.

**Filtering By Custom Data Field** – One of the best aspects of the QuickBooks Custom Data Fields is that they can be <u>included on your reports</u> and <u>used to filter your reports</u>. For example, assume that at your boat marina, 23 of your 140 customers subscribe to your monthly engine cranking service. You could use the subscription field to filter a customer list to include only those customers who subscribe. You could also include the boat name and

slip number in the report making bit easier for a work to pull out the correct boats and start the engines.

#### How to Assess the Skills of a Potential QuickBooks Bookkeeper

I am frequently asked to assist my clients in the interview, evaluation and selection of a QuickBooks bookkeeper. Presented below are a few tips that might help you perform this task. It is important to evaluate a potential bookkeeper for both their knowledge of QuickBooks and their knowledge of accounting. Any accountant can learn QuickBooks, it is the accounting knowledge that is much harder to come by.

**Evaluating a Candidate's Knowledge of QuickBooks** – I have found it useful to ask the candidate to launch the check writing screen, invoice screen, and checkbook register screen. If the candidate uses the graphical menus or drop down menus – they are a novice at QuickBooks. If they use the keyboard shortcuts CTRL+W, CTRL+I, CTRL+R, then they have probably driven QuickBooks around the block a few times. You should also ask the candidate to complete a few common tasks such as editing a template, filtering a report, memorizing a transaction, adding an account, finding a check written to a specific vendor, or assessing a finance charge. If the candidate can do all of those things, they are probably well worth hiring.

**Evaluating a Candidate's Knowledge of Accounting/Bookkeeping** – Most companies rely on the candidate's job experience but I prefer to ask a few simple questions instead, as follows:

- 1. Insurance Payment When you pay the insurance 6 months in advance, do you set it up as an asset and write off one-sixth's worth each month? If the candidate looks at you silly and makes fun of you for thinking that insurance expense is an asset, that is proof that they do not fully understand accrual based accounting.
- 1. Bank Reconciliation When you reconcile the bank statement each month, and the statement does not balance, what types of measures do you take to locate the difference? Bank reconciliations seldom balance on the first try, there are almost always discrepancies. If the candidate stammers around and offers no logical thinking process for locating the discrepancies, then they probably have limited accounting experience.
- **2.** Loan Payment What is the correct entry to record a loan payment? If they fail to break out the interest and principal portions, and debit the appropriate interest expense and loan payable accounts their accounting skills are lacking.
- **3.** Allocation Explain how you might enter an adjusting journal entry to allocate rent expense across multiple departments. *If the candidate has trouble explaining a*

reasonable formula for allocating the rent, or has difficulty explaining the potential AJE, then their accounting skills are lacking.

#### Templates

CPAs should understand that not only can QuickBooks templates be edited, <u>templates should</u> <u>be edited</u> <sup>65</sup>. Elements such as company logos, columns to be included on the forms, and the specific data that flows to the form can be customized. I've never met a template that could not be improved upon in just a few minutes time. To edit a template, choose List, Templates and double click a template.

		Rock Ca View	tle Construction - QuickBooks: Premie Lists Accountant Company Custo			eports Online Services Wind	low Help

	_		$\downarrow$		Templates   Open F	Form Include in <u>a</u> ctive	

#### Why Edit Your Templates?

It is foolish to think that the default data fields and columns included on the templates are exactly what the company needs. For example, you might use a different invoice format when billing for services versus selling items, or selling to government versus private companies. You can create as many templates as you want – why try to make one invoice format fit all situations – it's easier to use the invoice that's right for a given situation.

Note - Prior to 2005, this feature was complicated to use because users had to first make a duplicate of the original template, and then edit that duplicate in order to have complete access to all of the customization tools. However, that issue has been cleaned up and is no longer a problem unless you find yourself working in an older version of QuickBooks. Still, you might have attempted to use this feature prior to 2005 and incorrectly concluded that there was not much substance to customizing templates.

**Demonstration Points** – The primary features that CPAs should know about customizing templates are as follows:

- a. Adding New Columns
- b. Adding New Data Fields
- c. Adding Images (Such as A Logo)
- d. Adding Text (Great marketing Opportunity)
- e. Using the Re-layout Tool (Drag and Drop, Resize items)
- f. Adjusting the Envelope Window (So the Postman can read the address)
- g. Using the Lasso Tool (To move multiple objects)
- h. Naming the Template (Make it easier to identify)
- i. Exporting Templates (For use with other clients)
- j. Importing Templates (More template designs available from the web)
- k. Make default the Template Default (Just by Using It)

At a minimum, you should move the send to address box over and down a little bit so that it fits properly in the standard Intuit Window envelopes. Next scan the data list and place a check mark next to any other elements you would like to appear on the template – depending upon the business, there may be a few, or many additional data bits you would like displayed.

The layout designer tool shown below enables you to resize and move form elements around. This step is necessary because QuickBooks throws different elements on the template as you add them, but not necessarily in the right places. You need to visit the layout to make sure that no items overlap or are positioned outside the printable margins.

#### **Financial Reporting**

**Financial Reporting** – <u>QuickBooks offers some of the strongest financial reporting capabilities</u> in all of accounting software, stronger even than the standard financial reporting provided by SAP BusinessOne, Sage MAS 200, or Sage ACCPAC ERP. What makes it strong? Consider the following features:

- a. Modify Date Report Using English Phrases
- b. Modify Dates Using date Ranges (Not Recommended)
- c. Add Columns
- d. Drill Report
- e. Stratify Reports (ie: by customer and job; by inventory item detail)
- f. Filter Reports
- g. E-Mail Report (QuickBooks Now Uses Outlook)
- h. Export to Excel
  - i. Excel Options
  - ii. Send Header to Page Setup
  - iii. Gridlines
- i. Memorize Reports
- j. Processing Multiple Reports
- k. Suppress Account Numbers on Reports
- I. Financial Statement Designer (Discontinued in 2008)
- m. Statement Writer
- n. Graphs
- o. Report Finder & Report Center
- p. Display Options Box Before Displaying Reports

Often, a bookkeeper using QuickBooks does a nice job; however refuse to consistently produce and distribute the necessary reports each day, week and month for the staff to use in order to properly manage the business. These bookkeepers frequently report that they have too much work to constantly print the reports that company officials would like to see circulated throughout the organization on a recurring basis. This a common problem and you might ask, how much time should it normally take to produce the typical reports for the average company?

The accounting system should function exactly as described above, but the bookkeeper is correct too, it does take a great deal of time to produce all of the required reports, even for a smaller sized business. QuickBooks provides a good solution called **Process Multiple Reports** which could solve your problem. Here's how it works:

 Start by opening your Memorized Report List in QuickBooks by selecting Reports, Memorized Reports, Memorized Report List from the QuickBooks Menu. Next click the Memorized Report button in the bottom left corner of the Memorized Report List (shown below) and select **New Group**. Name the new group **Month End Reports** and then select **OK**.

Memorized Report V	Display	Print
Dump Template		
Export Template		
Import Template		
Re-sort List		
Print List	Ctrl+P	
Customize Columns		
Delete Memorized Report	Ctrl+D	_
New Group		
Edit Memorized Report	Ctrl+E	1
	PA	

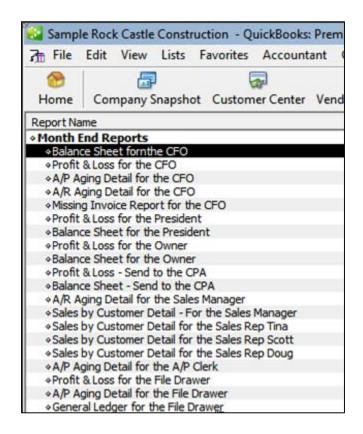

- 2. Next, open each report that you would like to produce at month end and memorize that report into the new **Month End Reports Group** as follows:
  - a. Launch a report that you want produced each month;
  - b. Customize that report to include the desired columns, date ranges, filters, etc.;
  - c. Click the **Memorize** button and if asked, then click the **New** button;

Memori	ze Report		
?	The report you are memorizing is a memorized report or create a new o		ort. Would you like to replace the original
	Replace	New	Cancel

d. Edit the **Name** of the report to also include the name of the intended recipient of the report as circled in the screen below. Check the check box titled **Save in Memorized Report Group** and select **Month End Reports** from the drop down box, then select **OK**.

	<b>Rock Castle Construction</b>	
	Profit & Loss	
	January 1 through December 15, 2013	
		<ul> <li>Jan 1 - Dec 15, 13</li> </ul>
Ordinary I		
Ince 🔝 Memorize Report	×	
Name: Profit & Loss for the President		45,729.25
Save in Memorized Report Group	Marth Ford Departs	211,193.92
Save in Memorized Report Group		120,856.67
OK Cancel	Troy's Month End Reports	83,964.35
	Accountant	-48.35
	Banking	0.00
Total Construction Income	Carlton's Month End Re	461,695.84
	Company	
40500 · Reimbursement Income	Customers	
40520 · Permit Reimbursement Income	Employees Vendors	1,223.75
40530 · Reimbursed Freight & Delivery		946.05

e. Repeat the above process until you have memorized each report to be produced at month end, including duplicates of the same report for distribution to different personnel. Be sure to include the name of the intended recipient in the report title name so it will be easier for a staff person to distribute the printed reports. Ultimately the goal is to build a group of memorized reports similar to the example shown below:

Tip: You can rearrange the order of the reports by clicking and dragging the small diamonds to the left of each report name so the reports will print in collated order for easier distribution.

f. At month end when the time comes to produce the reports, select **Reports, Process Multiple Reports** from the **QuickBooks Menu** to display the **Process Multiple Reports** dialog box shown below.

ose	e the reports to process, the	n press Display or Print.

Select the desired group to be printed from the **Select Memorized Reports From** drop down box at the top of the dialog box, and click the **Print** button. Tip: For those that would like to distribute electronic reports rather than paper-based reports, you can choose to print to Adobe Acrobat PDF or Excel formats, and then e-mail the reports as attachments.

**Reporting Tools** - Once you have printed a report to the screen, the real reporting power of QuickBooks starts to shine. As shown in the screen below, buttons at the top of each report make it easy to modify, memorize, print, or export the report to Microsoft Excel.

For example, here is the same report presented with two different column formats:

The first report shows P&L data by customer and job, while the second report displays the same P&L data by item sold.

Adding or Deleting Report Columns - Reports that list individual transactions can display additional columns of data. To do this, click Modify Report and from the Display tab, click Add Columns and select the columns you want to add. To delete columns, clear the checkmark for each column you want to delete. As a tip, the column titled "left margin" adds white space along the left edge of the report. By deleting this column, you can gain some extra room for report data.

**Drilling Reports** – One of QuickBooks' best reporting features is the ability to drill down. Just double click on any number you see in QuickBooks to see the details for that number. Keep clicking until you reach the source document.

**Refresh Button** - The refresh button appears in the toolbar of every report and graph. If refresh is needed, a message appears in the title bar indicating that the report or graph doesn't reflect the latest changes to your company data.

**Memorizing a Report** – Whenever you change the settings for a report or title, you can memorize the report with the new settings. Then, when you want to view that same report in the future, you can recall it from your own list of memorized reports. When QuickBooks memorizes a report, it memorizes your custom report settings, not the data in the report.

If you have recalled a memorized report and changed it further, you can indicate whether you want QuickBooks to replace the earlier report (under the same name) or create a new memorized report (under a new name).

**Memorized Report Group** - You can assign the report to a memorized report group by selecting "Save in Memorized Report Group", then choose the desired group from the drop-down list. The memorize report dialog box is shown below:

Memorize Report						
Name: Profit & Loss						
Save in Memorized Report Group:	Accountant					
OK Cancel						
Dates This Month-to-date From 12/01/2003 🔳 T						

**Suppress Account Numbers on Reports** – QuickBooks allows you to toggle the display of account numbers throughout QuickBooks on or off. The benefits of using account numbers are as follows:

- 1. With account numbers turned on, you can dictate the sort order in which accounts are displayed within an account type (i.e. you can make sure that the accumulated depreciation account appears below property and equipment, not above.)
- 2. Many CPAs find that account numbers provide faster data entry, especially when the account numbers are memorized and a number key pad is used.

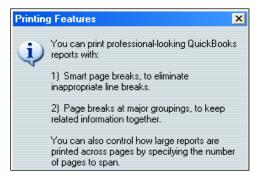

However, there is a problem with turning on account numbers because many CPAs don't want the account numbers to be displayed in the financial statements and reports. To solve this problem, there is an option to hide them in a report, but you must be logged in as the administrator and running in single user mode. Even then, this option does not stick – you must reapply the feature to hide the account numbers each time the report is produced, even if you memorize the report with the account numbers hidden.

There is a better solution to suppressing account numbers from financial statements, as follows:

- a. First, edit all account descriptions
- b. Next, select "Show Reports Based on Description Only" from the preferences screen.

This action will now suppress account numbers from your financial statements, and use the account description instead of the alphanumeric account number. Please note that descriptions can differ from accounts (*AR vs. Trade Receivables*)

**Print Breaks** – QuickBooks provides a smart feature that can insert page breaks in your reports so that groups of information remain together. Or, to conserve paper, QuickBooks can insert as few line breaks as possible. This option is shown in the dialog box below:

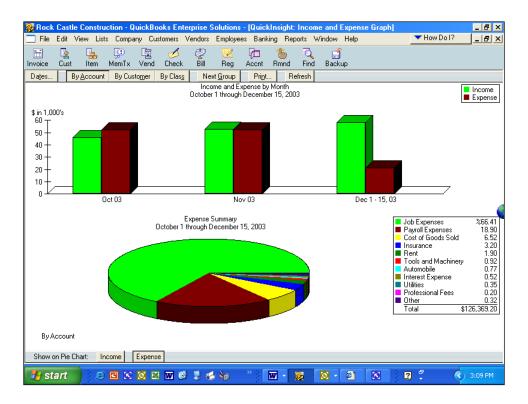

Once you print a report, you will find a wide number of print options available – some of which will differ slightly depending upon the printer you are printing to.

Print Reports	💌 Ho	w Do I?
Settings Margins		
Print to:		Print
Printer: \\CARLTON\HP LaserJet 41	00 PCL 6 on I	Cancel
C File: ASCII text file	Help

<ul> <li>Page Breaks:</li> <li>✓ Smart page breaks (widow/orphan control)</li> <li>☐ Page break after each major grouping</li> </ul>	Number of copies:	
Fit report to 1 page(s) wide	Print in color (color printers only)	

**Print Preview** – You should always use is print preview before printing to ensure the report appears as intended before paper is wasted. In many cases, you can access the information you need without actually printing the report to paper. Printing to paper not only takes time, but it costs money for paper and toner, and creates wear and tear on your printer. Ultimately the reports you print will need to be burned or thrown away in a landfill or garbage heap. Why eat valuable time and money? Use the screen and avoid printing on paper whenever possible.

**Graphs** - QuickBooks produces a wide variety of graphs and charts, like the sample income and expense graph shown below:

**Drilling Graphs** - Graphs can be drilled just like reports – to do this, just double click on the desired bar or pie slice to see the underlying supporting details. <sup>33</sup>

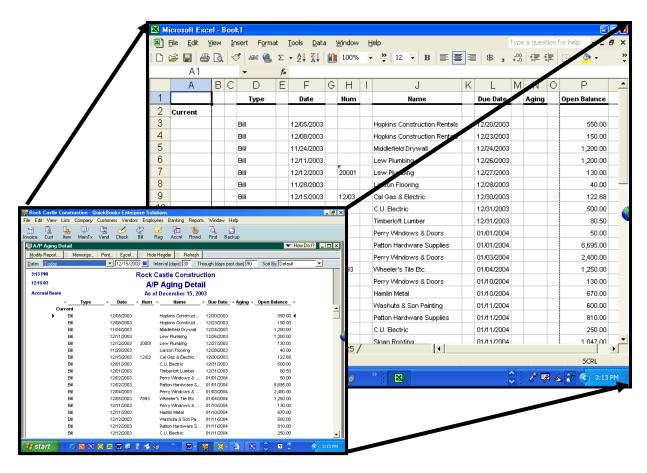

**Report Center** - The screen below displays the Report Center – a utility that helps you locate the report you are looking for. With the Report Center, you can browse the reports related to what you are interested in, briefly learn what each report has to offer, and locate exact reports by search terms. When you find the report you want, you can display it in the Report window, just as if you had created the report by choosing its name from the Report menu. If you don't need to view the report in the Report window, you can print the report or send it to Excel directly from the Report Center. You can also customize the report's content, filter the report, or change the report's date range without displaying the report. This is a faster way to create, modify, or print reports.

As discussed, the reports menu shown below provides access to the same reports as does the Report Center, and does it a little quicker.

Any QuickBooks report can be exported to Excel with a simple click of a button. Be aware that this is a one way ride, data changes in Excel cannot be automatically carried back into QuickBooks as this action would violate all the rules of data validation and a secure audit trail.

**Excel Options** - When sending report to an existing Excel spreadsheet, you can either send your data to a new blank worksheet, or open Microsoft Excel and add the contents of the QuickBooks report to an existing spreadsheet. The spreadsheet could be one that you previously created in Excel or one that QuickBooks created during a previous export. Some of the advanced options are shown in the screen to the right.

#### 2. Company Snapshot

The QuickBooks Company Snapshot doesn't really add any new functionality, but it does organize important data to make it faster and easier for managers to quickly view this key information which means they are more likely to look at as often as they should. The QuickBooks Company Snapshot includes five sections as follows:

- Income and Expense Trend Graph A bar graph displaying income and expenses for the period of time you select.
- **Reminders** You can select from the list of Reminders to be displayed.
- Account Balances The account balances section allows you to view details for any account.
- Customers Who Owe Money List of who owes you money, the amount and the due date. You can sort it by customer, due date, or amount due.
- Vendors to Pay List of who you owe money to, the amount and the due date. Again, you can sort it by vendor, due date, or amount due.

#### Accountant's Copy

The Accountant's copy function enables the client to send a special file copy of the QuickBooks data to the accountant for review and adjustments, while also allowing the client to continue to use QuickBooks at the same time. Thereafter, once the accountant has completed their review and adjustments, the accountant can send the adjusting journal entries back to the client for automatic posting. The beauty of this approach is that the client does not have to stop using their accounting system while the accountant is reviewing and adjusting that accounting system. This is an excellent idea, unfortunately this approach has had more than its share of problems as follows:

 <u>Missing Data and Functionality</u> - Initially, accountants could not add accounts or drill into data details. While Intuit has addressed this problem many times, the Accountant's Copy still does not give the CPA full access to all data details. <u>The chart</u> <u>below</u> <sup>77</sup>, each "N" on the following chart represents a function that CPAs or clients cannot perform when using the Accountant's Copy feature.

		Accountant							Client

2. **Too Technical** - This approach requires the client create files, send files, and then import adjusting entries. This is a manual procedure that may be too little technical for many client's bookkeepers to handle without frustrations.

- 3. **Multiple Copies of QuickBooks** <u>This approach requires the CPA to maintain multiple</u> <u>copies of QuickBooks (different years and different editions)</u> <sup>118</sup> in order to accommodate the multiple versions of QuickBooks data files they receive.
- 4. <u>Begs for Once a Year Assistance</u> Because of the troubles, the Accountant's Copy feature practically begs the CPA to delve into and review the client's data only once a year after the end of the year. By then, it is too late to fix major accounting errors, or offer on-going professional advice throughout the year. Typically QuickBooks clients need the hand holding and advice from a professional CPA throughout the year, not just at the end of the year.
- 5. Remote Access is Better <u>Remote Access technology has made Accountants Copy feature obsolete</u> <sup>120</sup>. Using Remote Access, a CPA can "dial" into the client's QuickBooks data each month or each quarter, review the data, make the necessary adjustments, produce the financials, and provide the client with professional observations and advice. If you refer to the chart in bullet point 1 above, you will find that the Remote Access approach provides 100% of the functionality to both CPA and <u>client</u>. <sup>121</sup>

#### **Remote Access**

Using Remote Access, a CPA can log into their client's QuickBooks accounting system in about 30 seconds, review the system, correct problems, post adjusting journal entries, and log out <sup>122</sup>. This approach is elegant and works very well. This approach makes the Accountant's Copy approach obsolete for many reasons as follows:

- Full Access to all QuickBooks Functions and Data With Remote Access, the CPA <u>can see</u> <u>all data and make all necessary changes</u> without any of the restrictions imposed by the Accountant's Copy approach.
- No Need to Maintain Multiple QuickBooks Copies With Remote Access, there is <u>no need</u> for the CPA to maintain multiple copies (different years and different editions) of QuickBooks on their computer. Instead, the CPA simply uses the client's copy of QuickBooks – not matter which year and edition it is.

- 3. <u>No Need to Send, Receive, or Juggle Files</u> With Remote Access, the CPA and client waste no time producing, sending, receiving, storing, opening, saving, and exchanging data files.
- 4. Real Time Training Many Remote Access solutions also transmit voice through the connection, which means that not only can both CPA and client see the same screen, but they can hear one another too <sup>126</sup>. Therefore, using Remote Access, the CPA can log into the client's QuickBooks accounting system to demonstrate functionality and to train the client and client' staff <sup>127</sup> in the use of QuickBooks.
- 5. Professional Assistance Throughout the Year Your client needs you throughout the year, not just at the end of the year after the year is completed. Using Remote Access, a CPA can log in regularly to help keep the books in order, and to make observations about the data and to advise the client throughout the year. Because the Accountant's Copy approach is so tedious, I know of no CPAs in America that use the Accountant's Copy feature with a single client multiple times throughout the year.

Intuit's Remote Access Solution - For just \$3.95 a month, QuickBooks Remote Access allows you to access your client's QuickBooks data from anywhere in the world using a computer and Internet connection. (No long-term contract required). This solution is nice because it only allows the user access to the QuickBooks application and data <sup>132</sup>, but not to the other files and data residing on the client's computer.

For just <u>\$7.95 per month</u> the CPA can access the client's entire computer system (all files and software programs). (Once again, no long-term contract required).

Coupon - Here is a special coupon for free Remote Access Service.

http://quickbooks.intuit.com/product/add\_ons/remote\_access.jsp

**Other Remote Access Solutions** <sup>135</sup> – Here is a link to more than 425 downloadable Remote Access solutions: <u>http://www.download.com/Remote-Access/3150-7240\_4-0.html</u>; Some of the most popular Remote Access solutions are as follows:

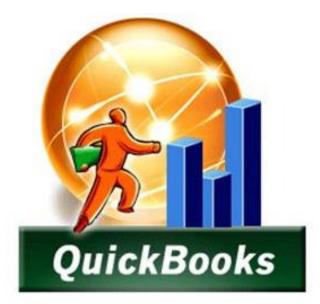

Some High End <u>Remote Access Solutions</u>

**Benefits of Using Remote Access** – In addition to QuickBooks access, there are numerous situations that call for a remote access solution. Traveling employees often need access to their e-mail, calendar or contact list. Traveling sales representatives need access or to the accounting system for entering orders of looking up inventory levels and customer history information. Work-at-home employees need access to their office computer. Multiple location companies need to connect remote locations to a centralized accounting system. Troubleshooting/support professionals need to log into the customer's remote system for maintenance purposes.

# QuickBooks Shortcuts

## **CHAPTER 4**

#### **Keyboard Shortcuts**

- a. Y, K, M, H, R, etc.
- b. Home, Home, Home; End, End, End
- c. CTRL + A, I, E, F, J, M, P, W etc.

Presented below are a variety of keyboard shortcuts available within QuickBooks:

#### **DATE RELATED SHORTCUTS**<sup>141</sup>

Y	First day of the Year	W	First day of the Week
R	Last day of the year	К	Last day of the week
Μ	First day of the Month	+	Next day (also next form #)
н	Last day of the month	-	Prior day (also prior form #)
Т	Today		

#### MOVING AROUND IN QUICKBOOKS SHORTCUTS

1 (or 2, 3)	Before popular list items (fast)
Down arrow	Move down a line
Up arrow	Move up a line

Ctrl +DownArrow	Scroll through list while in form
Ctrl + Enter	Record entry (if Enter moves)
Ctrl + Page Up	First item/ list, prior month/ register
Ctrl + Page Down	Last item/ list (next month/ register)
Ctrl + UpArrow	Scroll through list while in form
End	End of field
End End	End of transaction
End End End	End of register
Enter	Record transaction, default
Esc	Cancel edit, close window
Home	Beginning of field
Home Home	Beginning of transaction
Home Home Home	Beginning of register
Page Down	Scroll down a page
Page Up	Scroll up a page
Shift + Tab	Move to prior field
Shift	Center open window
Tab	Move to next field (or Enter)
Ctrl + 1	Show important QuickBooks data.
Ctrl + 2	Turn on QBWIN.LOG
Ctrl + A	Chart of Accounts 145

Ctrl + C	Copy text to clipboard 146
Ctrl + D	Delete transaction – item
Ctrl + E	Edit
Ctrl + F	Find
Ctrl + G	Go to other account register
Ctrl + H	Get transaction history
Ctrl + I	Create Invoice 147
Ctrl + J	Customers, Jobs
Ctrl + L/Down Arrow	List
Ctrl + M	Memorize <sup>148</sup>
Ctrl + N	New transaction
Ctrl + O	Copy transaction in register
Ctrl + P	<u>Print</u> 149
Ctrl + Q	Quick Report from List 150
Ctrl + R	Go to transaction register
Ctrl + T	Recall memorized transaction
Ctrl + U	Use item on list
Ctrl + V	Paste text from clipboard 151
Ctrl + W	Write checks <sup>152</sup>
Ctrl + X	Cut text to clipboard
Ctrl + Y	Display transaction journal
Ctrl + Z	Drill down report/undo last change
Ctrl + Up Arrow	Scroll through list entries in form
Ctrl + Del	<u>Delete line</u> <sup>153</sup>
Ctrl + Down Arrow	Scroll through list while in form
Ctrl + Enter	Record entry (if Enter moves)
Ctrl + F1	Hide / show cue cards
Ctrl + F6	Next window
Ctrl + Ins	Insert line
Ctrl + Left Arrow	Prior word in field
Ctrl + Page Up	First item/ list, prior month/ register
Ctrl + Page Down	Last item/ list (next month/ register)
Ctrl + Right Arrow	Next word in field
Ctrl + Up Arrow	Scroll through list while in form

#### **CUT & PASTE SHORTCUTS**

Ctrl + C	Copy text to clipboard
Ctrl + D	Delete transaction – item
Ctrl + V	Paste text from clipboard
Ctrl + X	Cut text to clipboard
Ctrl + Z	Undo last change or drill down report
Ctrl + Del	Delete line
Ctrl + Ins	Insert line

#### **OTHER SHORTCUTS**

Alt + Down Arrow	Display list for a field

Tab	Move to next field (or Enter)
Type first letters	Quick Fill names in list
Up arrow	Move up a line
W	First day of the Week (in date)
Y	First day of the Year (in date)

#### **QuickBooks Networking Limitations**

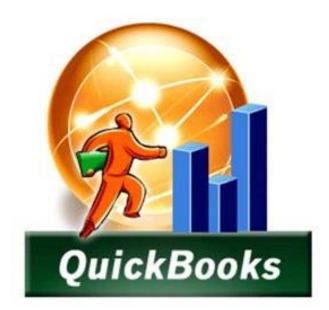

<u>QuickBooks was not originally designed to be a multi-user product</u>, the networking capabilities were added as an afterthought. As a result:

- d. You must toggle between single user and multi-user mode to perform certain tasks.
- e. QuickBooks uses file locking, not record locking; which means that when one user is editing a customer record, another user cannot generate an aged receivables report until after the first user is done.
- f. Not a true networking environment compared to most systems because QuickBooks must be installed on every computer and QuickBooks must be up and running on the host computer for others to access the data file.

#### Steps to Take When QuickBooks System is Running Slow

The Achilles heel of QuickBooks is its' slower performing databases. Don't misunderstand me, they work very well with smaller data files. However, it is possible to outgrow QuickBooks and the system will start running slower, eventually to the point that it may take 30 seconds for each screen to appear. When this happens, here are measures you can take to speed things up.

- a) Defragment hard drive.
- b) Purchase a new computer with an SSD drive.
- b) Use Condense Tool (formerly called Archive and Condense and Clean Up).
- c) <u>Create a portable company file, move the original file, and then open and use the</u> <u>portable company file. This re-indexes the database on the fly and makes the system</u> <u>run much faster. You will need to repeat this process periodically.</u>
- d) Turn off QuickBooks Preferences (auto-refresh graphs, alerts, reminders).
- e) Run in single user mode (or run in single user mode part of the day).
- f) Add more RAM to your computer.
- g) Get a faster computer.
- h) Install faster network (100 mbs or faster)
- i) Upgrade to QuickBooks Enterprise much faster database.

# QuickBooks What's New "2014 thru 2005"

## CHAPTER 5

#### How Intuit Updates QuickBooks Each Year

**Avoiding Bloatware** - Intuit has a problem that it does not like to discuss publicly. <u>Specifically,</u> <u>Intuit does not want to improve QuickBooks by adding features</u>. I know this sounds strange, but hear me out. Every time Intuit adds new functionality to QuickBooks, the product becomes more complicated and difficult to use. Hundreds of accounting systems before QuickBooks have taken the "Add every feature you can to your product, including the kitchen sink" approach. But those companies have ended up with "bloatware" that many companies simply don't want.

**Restraint** - Intuit knows that most companies ask for more features, but they restrain themselves in order to keep the product simple. If you really want a product with a thousand more features, then go out there and buy Sage MAS 200, Microsoft Dynamics GP, or SAP Business One. Those products each have several thousand more features than QuickBooks. But if you look at the results, those products which are among the top accounting software products in the world aren't doing too well. Their sales are flat and have been under achieving for a dozen years. When it is all said and done, companies really want inexpensive, simple solutions - and that is exactly what QuickBooks offers <sup>174</sup>. If Intuit started piling on the featur4es (which they easily could), they would ruin what they have.

**Handful of Features** - For this reason, <u>Intuit barely updates their product each year, at least that's</u> what they used to do. They used to come out with 10 to 15 new features a year just so the marketing department has something new to tout in order to encourage you to upgrade. If you look closely, typically half of those new features touted were already in QuickBooks the previous year. Look closer still and you will find only 2 or 3 new features each year that are really worth getting excited about.

**Airplane Analogy** - Look at it this way. If you wanted to learn to fly an airplane today, you could march down to your local community airport and your instructor would let you take the wheel of a little Cessna airplane on your very first flight. There are only a few gizmos and gadgets you would need to learn to make that happen. Within a few weeks you'd be flying high. Now assume that you wanted to learn to fly a 777 jumbo jet. There are gizmos and gadgets located all over the cockpit – even on the ceiling and walls. It might take you three years to learn how to fly that

jumbo jet because of the complexity. In this analogy, QuickBooks is the small Cessna aircraft and SAP Business One is the jumbo jet. One is cheap and simple to operate, the other is expensive and complicated to operate. American companies across the country have shunned the jumbo jet in favor of the cheaper and easier to use two-seater plane – why would Intuit destroy that by heaping on a massive amount of new features each year?

#### **New Features Coming Faster**

Since 2011, Intuit has been pouring in more features, and you can see this in the listings below.

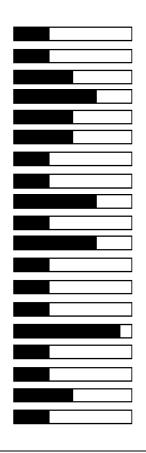

**Committed to Quality -** Please don't mistake me as saying that Intuit is not committed to quality – they are extremely committed to eliminating bugs from the system, it's just the add-on features that they resist most, and rightfully so.

<u>New Features</u> – Presented below is a list of each significant new feature added or improved over the past 6 years. I've inserted a rating next to each new feature or improvement that shows in my opinion how excited I am about that new or feature or improvement. This information is presented in summary form, but you can see lengthier discussions of each of these features including screen shots on my web site.

#### New in QuickBooks 2014: Carlton's Ten Star Rating

#### QuickBooks 2014 Pro, Premier and Enterprise:

- 1. Global Access Bar added containing three tools
- 2. Client Collaborator Added
- 3. Maintenance Alerts Added
- 4. Reminders and "To Do's" Numbered Indicator Added
- 5. New color (from grey to dark blue)
- 6. Customize the Account Balances View
- 7. Removed the "My Apps" tab
- 8. Removed the "Do Today" tab
- 9. Copy and paste detail lines in transaction forms

- 12. Online Banking Automatic mapping & new wizard
- 13. Improved Accountant's Copy Better import, mapping to 1099.
- 14. Free Business Web Site Still no integration to QuickBooks
- 15. History Easier to enter after-the-fact payroll data
- 16. Adobe New invoice, sales order & estimate templates
- 17. **Conversion** Updated tools for Peachtree & MOA files
- 18. Vista Microsoft Vista Logo Certified
- 19. Stronger Encryption 2048-bit key replaces 1024-bit key

#### Carlton's Ten Star Rating

#### **Carlton's Ten Star Rating**

#### www.CarltonCollins.com

#### New in QuickBooks 2008:

- 1. E-Mail through Outlook Contact lists, sent folder
- 2. New Excel Template Import Excel data into QuickBooks
- 3. Improved Help See screen and help window at same time
- 4. Merchant Service New ability to validate credit card funds
- 5. Time Tracker Track billable hours from Outlook
- 6. Share Records with CPA Dividing date, track CPA's changes
- 7. New Time & Expense Screen See both on one screen
- 8. New Premier 3 User Edition Really just a new price point

#### New in QuickBooks 2007:

- 1. **Time Tracker** Excellent online fully integrated timesheet
- 2. Portable File Smaller files, Re-indexes file to gain more speed
- 3. Unit of Measure Conversions Typically a higher-end feature
- 4. Multi-Parcel Shipping Via UPS and FedEx
- 5. Convert Sales Orders to Purchase Orders Yeah!
- 6. Larger List Limits Up to 10,000 items, customers or vendors
- 7. Better Payroll Data Key payroll data at a glance for \$7/month
- 8. Preview Forms before Printing I guess this is good
- 9. Automatic Vendor Expense Classifications Did that in 2006
- **10. Google Desktop Searching** Give me a break, not a QB feature
- 11. Improved Backup Wizard Big yawn
- 12. Thermal Printing Shipping Bigger yawn
- 13. Google Marketing Sale pitch for Google Adwords, Come on
- 14. Improved Accountants Copy Use Remote Access instead
- 15. "Always On" Audit Trails Did that in 2006, doesn't hit GL

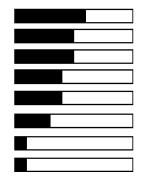

16. New Pro 3 User Edition – Just a new price point

#### New in QuickBooks 2006:

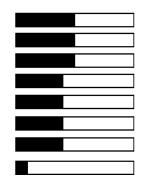

- 1. New Set Up Screens 15 to 30 screens instead of 130
- 2. New Home Page Organizes key data on a single screen
- 3. Toggle Editions Make menus look like any other QB product
- 4. Other New Screens Customer, vendor, employee, reports
- 5. New Database Faster, but new problems in multi-user mode
- 6. More Users in QB Enterprise Up from 10 to 15 users
- 7. Permanent Audit Trail I wish it hit the GL
- 8. Basic Dropped QuickBooks Basic Edition has been dropped

#### Carlton's Ten Star Rating

**Carlton's Ten Star Rating** 

#### Carlton's Ten Star Rating

#### 9. Lower Pricing - By \$100, not a feature

10. Goodbye Upgrades - Eliminated upgrade pricing options

#### New in QuickBooks 2005:

- 1. Financial Statement Designer Control indent, add columns
- 2. Working Trial Balance Tool Uses CPA Work paper formats
- 3. Voided/Deleted Transactions Report Show voided transactions
- 4. Interactive Tutorials High quality training videos, voice & pause
- 5. Version Detector Hover icon to see data file year & edition
- 6. Payroll Enhancements Do-it-yourself payroll solution
- 7. Enhanced Security More control over users
- 8. QuickZoom View retained earnings entries
- 9. Manage Customer Payments Better- streamline AR tasks
- **10. Simple Start Edition** Checkbook caliber version of QuickBooks

See my detailed discussion of these 2008 features at http://www.QuickBooksAdvisor.com

#### Carlton's QuickBooks Wish List

While I do agree and approve of Intuit's strategy to keep QuickBooks as simple as possible, there are critical features that I would like for Intuit to add to QuickBooks as follows:

#### 1. Quantity break pricing.

- 2. Automated e-mail delivery of financial reports based on custom schedule.
- 3. Dozens more custom user definable fields.
- 4. More account number segments.
- 5. Ability to attach electronic documents to transactions. (done in 2010 thank you)
- 6. Picture support for inventory items.
- 7. Automatic allocation calculations and journal entries based on formulas.
- 8. An integrated web store solution that exports the inventory data (and pictures) right out of QuickBooks to automatically create an online integrated web store.
- 9. An audit trail that actually hits the general ledger.
- 10. The ability to schedule automatic delivery of reports to e-mail recipients.
- 11. The option to have voided checks hit the current period.
- 12. Ratio reports, including comparisons to industry averages.
- 13. Automatically hide unused menu items to keep menus simple.

Carlton's Ten Star Rating

### Bio for J. Carlton Collins, CPA

ASA Research Carlton@ASAResearch.com 770.842.5902

J. Carlton Collins, CPA is a Certified Public Accountant with experience in technology, tax, auditing, accounting systems, financial reporting, and bond financing. He is an author, lecturer, and technology & accounting systems consultant.
